Pixelart Samurai Sideview Tileset - #1 - Wasteland

This pack contains **84 environment sprites** that can be perfectly used for 2D sideview Metroidvania, Adventure, Endlessrunner and many more game genres. This pack contains **2 beautiful animated characters** with **97 character sprites**. This pack offers an authentic wasteland environment and is part of a larger **Samurai Pixelart series**, featuring several environment and character packs. The pack comes with a sky background and 6 environment background layers. By using the **7 different background** layers it is possible to achieve **brilliant parallax**. The pack comes with **2 swordhit particle effects** and **all character animations as well as their animation controllers are already set up**.

The **ground tileset is 16x16** pixels and the **characters dimensions are 32x32**, but for reasons of animation effects their **animations come as 104x77**. The background objects are **shadowed** for extra details and realism. The **ruletile for the groundtiles is already set up**.

Color Legend:

- **purple = important information**
- **blue = unity directory or file path**
- **blue and underlined = link for website**
- green = Scene path

Folder structure:

- Environment: /Assets/49Wares/Art/Pixelart/Samurai Sideview Tileset/Environment
- Characters: /Assets/49Wares/Art/Pixelart/Samurai Sideview Tileset/Characters
